Company Summary

Calibre Concrete Group is a Melbourne based specialist in Industrial Concrete Construction. Our scope includes Fibre Slabs, Concrete Hardstands, Suspended Concrete Decks, Office Slabs, Insitu Columns, Walls, Stairs, Footings, Plinths etc. No matter what the concrete need, Calibre Concrete Group can rise to the challenge.

Founded by Directors Dot Dardha and Lachlan Beaton, their combined 50 years' experience in the concrete construction industry has allowed for the rapid ascension of Calibre Concrete Group to the forefront of the industrial concrete sector. We have successfully completed several significant projects across Melbourne for specialist commercial and industrial builders.

Our core team is made of experienced concreters, formworkers, foremen, project managers and estimators who will be able to guide and assist with all aspects of your projects.

Quality control is of utmost importance to our team, and this is on display in our high-quality finished concrete. Time is focused on the early planning phase, so timelines and concerns are all address long before a drop of concrete is poured.

Safety on site is a must to protect all stakeholders. Calibre Concrete Group understands how essential it is to foster a culture where every team member puts safety first and open dialog is encouraged.

Calibre Concrete Group's experience rests with its strong leadership:

Dot Dardha

As a Director in Calibre Concrete Group, Dot Dardha brings a wealth of 30+ years of experience and a proven track record of driving successful projects and achieving organizational growth.

With expertise in Project Management, Strategic Planning, Team Leadership, and stakeholder management, he has consistently delivered exceptional results and exceeded client expectations.
